BUSINESS MODEL CANVAS

Designed for : Retailers & Growers

Designed by : Syeda Anum Usman

Date : 25.04.2026

Version : 1.0

Problem

Avocado prices fluctuate unpredictably due to seasons and demand, making it hard for businesses to plan.

Unfair Advantage

- Trained on real historical regional data
- Customizable per region and avocado type

Solutions

Prophet-based forecasting model trained on 3 years of U.S. avocado price history, delivered as an interactive Jupyter dashboard.

Customer Segments

- Supermarket buyers
- Avocado growers/farmers
- Wholesalers and distributors

Key Metrics

- Forecast accuracy (MAE, MAPE)
- Cost savings for retailers

Channels

- Jupyter Notebook (for now)
- Could become a web dashboard later

Value Proposition

AvoCast gives retailers weekly avocado price forecasts so they can plan stock, time promotions, and reduce waste before prices change

Cost Structure

- Data sourcing and storage
- Model maintenance and updates

Revenue Stream

- Monthly SaaS subscription
- One-time consulting/setup fee
